The Monte Rio sewer project is as it has been: an ill conceived, inadequate and unnecessary plan. Now with the Occidental pipe to run right through town it is not to late to move in the right direction and hook up to the Guerneville plant as they could have done 7 or 8 years ago .The prmd and the board have made this into a vendetta that they wont let go of(Note the eminent domain fiasco), with the plan in place for expanded irrigation for Guerneville. its arrogance and vindictiveness that prohibits them from embracing reasonable, practical,less expensive solutions.

With a State buget crisis about to emerge ,the actual costs of this project unknown and unlikely to meet current estimates Show some leadership and deny this Grant
